- White Sucker
- Yellow Bullhead
- Yellow Perch
- Yellow Pickerel

*Mississippi Lake is one of the largest warm-water fisheries in Lanark County with yellow pickerel, northern pike, largemouth bass, smallmouth bass, and panfish being taken by anglers. Yellow pickerel fishing in the early season is very good in the Innisville area of the lake, and in the spring the yellow pickerel spawn in large numbers attracting people to witness the yearly spawning run. During summer months, angling success is regarded as good for all species.*

This map is intended for fisheries management purposes only. It should not be used as a guide in navigation because no effort has been made to show the various shoals and hazards which might occur between points of sounding.
